

Vista School is an asbestos free school. Our school was built in 2009 and was built with non-asbestos material. Please see the letter from Peck-Ormsby that validates this:

Vista School has a designated Asbestos person to see that the school is compliant to federal and state laws pertaining to asbestos. We do not allow asbestos to be used in any new construction.

In the event that asbestos is discovered Vista School would comply with all State and Federal laws pertaining to asbestos removal as designated by the EPA Code Part 763-Asbestos along with notifying parents, teachers, and employees. The asbestos would be immediately removed by a professional asbestos certified contractor.

CERTIFICATE OF ASBESTOS-FREE CONSTRUCTION

The undersigned, pursuant to the General and Supplementary Conditions of the Contract for Construction, hereby certifies that to the best of his/her knowledge, information and belief, the materials incorporated into the project, and as used during the construction process are free of any type of asbestos material.
